

Perspectives on Shape Shifting & Time Tilting

At first, the stars began to change in luminosity and color. Time batted her eyes and the stars went dark, and the void of space filled with the color of the stars in the depths of the nebula.

They had traveled far into the galaxy, to the super-colossal cosmic monasteries.

Warp drive engaged, the youthful astral travelers return from their trip. The travelers are soon greeted with the sight of their home planet on the radar. Some of the travelers are still experiencing visual distortions even as their ship lands.

The cosmic travelers who benefitted the most from the experience are the ones that found that another Cosmos exists within themselves.
